# Customer Profile & Segmentation

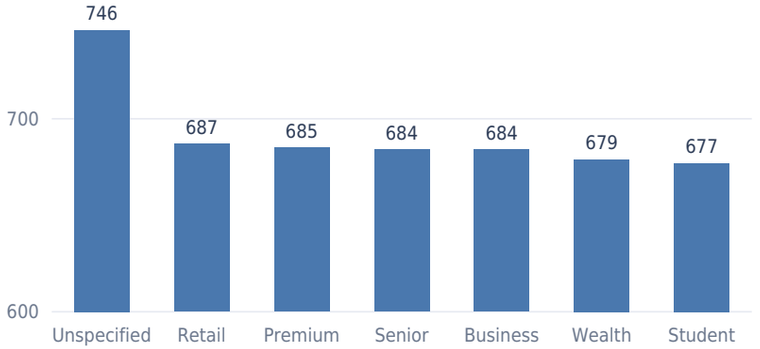

Segment All | KYC Status All | Date All

| Total Customers | Active Customer Rate | Average Credit Score | Average Annual Income |
|---|---|---|---|
| 500 | 75.0% | 683 | $152K |

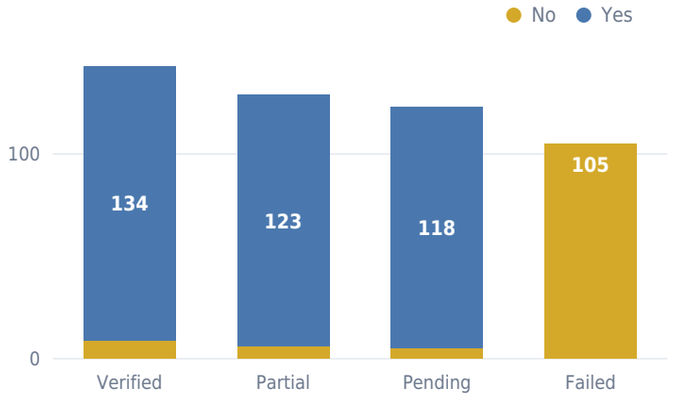

## How the customer base splits by segment

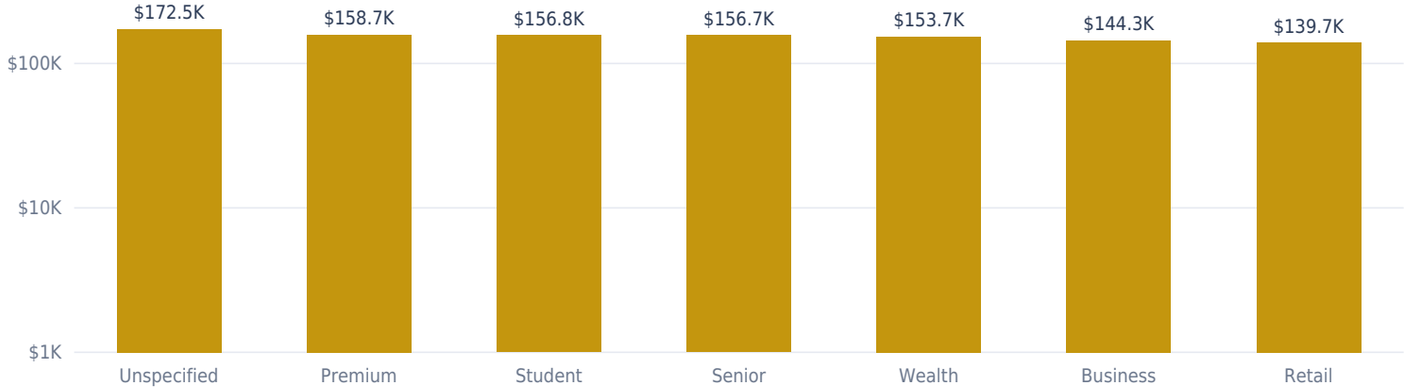

## Credit score barely moves across segments

## Total Customers by kyc_status and is_active

## Income swings nearly $19K by segment

## Insight

Average credit score barely moves across segments (677-687) even though average income swings by nearly $19,000 between the lowest and highest segment — segment labels look income-based, not risk-based.

Retail has the lowest income of any segment but the highest credit score — a low-risk group that's likely underserved.

# Account Usage & Branch Activity

**REGION**

- [ ] Central
- [ ] East
- [ ] North
- [ ] South
- [ ] West

**ACCOUNT TYPE**

- [ ] Business Checking
- [ ] Certificate Of Deposit
- [ ] Checking
- [ ] Ira
- [ ] Money Market
- [ ] Savings

**STATUS**

- [ ] Active
- [ ] Closed

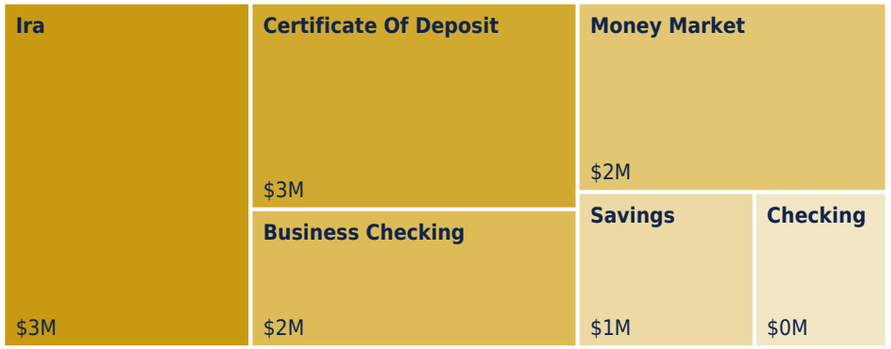

Total Deposits
₹ 10.2M

Average Account Balance
₹ 14,569

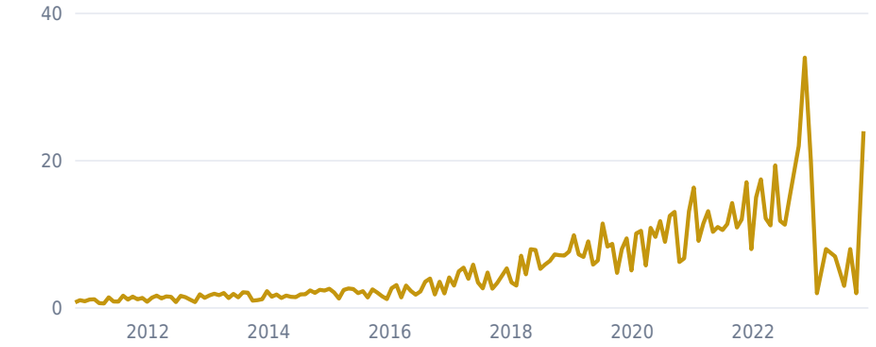

Active Account Rate
71.0%

Accounts per Branch
18

Checking accounts hold the most deposit value

Is new-account growth speeding up or slowing

Branch Performance

| Branch | Region | Deposits | Active % |
|---|---|---|---|
| Anchorage Branch | West | $1,41,700 | 66.7% |
| Atlanta Branch | South | $9,58,874 | 70.6% |
| Austin Branch | South | $3,43,026 | 70.0% |
| Baltimore Branch | East | $3,53,679 | 66.7% |

## Insight

Active accounts hold $10.2M in deposits, but 29% of all accounts are already Closed — worth checking whether closures cluster in specific branches or account types.

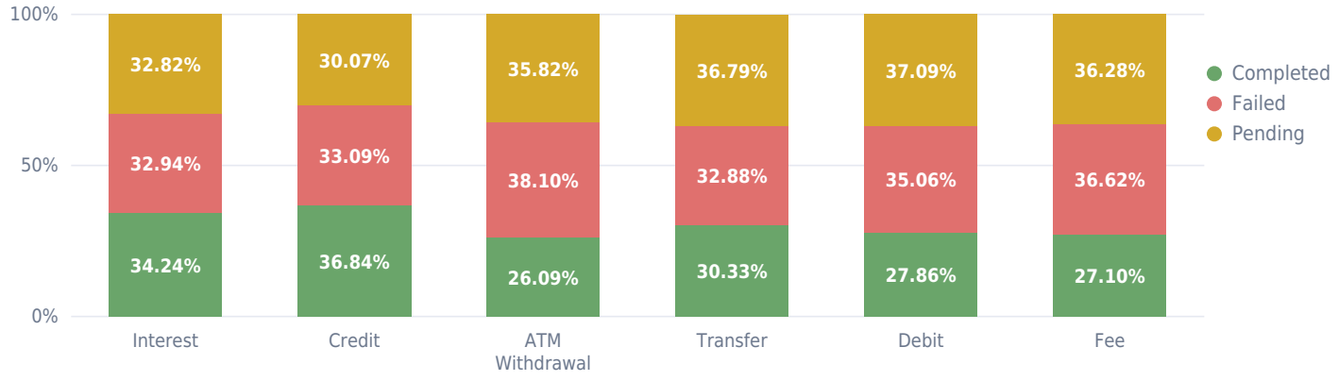

# Transaction Patterns

Total Transaction Value
$35.9M

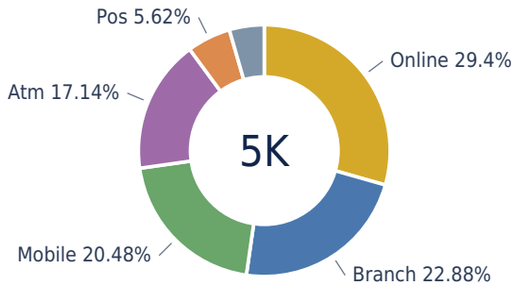

Average Transaction Amount
$7,178

Failed Transaction Rate
32.6%

## Which transaction types carry the most value — and the most failure

## Online and mobile lead transaction volume

## Are failures rising, falling, or holding steady?

## Branch Performance

| channel | Failed Rate |
|---|---|
| Atm | 34.0% |
| Pos | 33.8% |
| Branch | 33.0% |
| Online | 32.2% |
| Mobile | 31.7% |
| Wire Transfer | 29.5% |

**Insight:**

32.6% of transactions fail and another third are pending — only about a third complete cleanly. Worth flagging as the page’s headline finding, with a recommendation to investigate the worst channel.

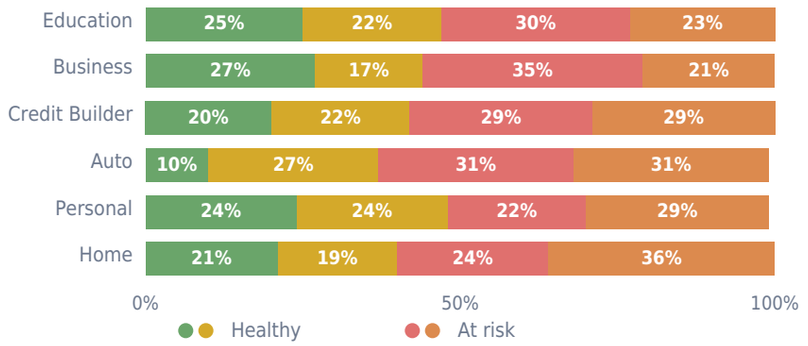

# Loan performance and repayment behaviour

| Total Loan Portfolio | Outstanding Loan Balance | Loan Delinquency Rate | On-Time Payment Rate |
|---|---|---|---|
| $72.2M | $53.4M | 56.3% | 28.7% |

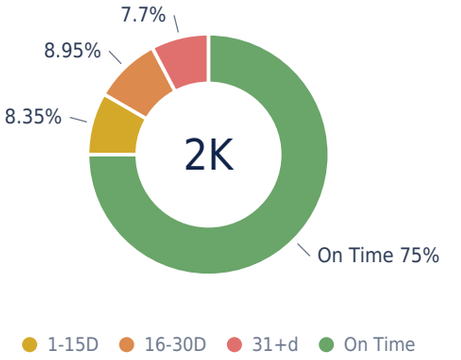

## Auto loans carry the most at-risk volume

## Which loan type has the worst risk rate, proportionally

## How far behind late payments actually run

## Is penalty growing alongside — or instead of — real repayment?

## Branch Risk

| Branch | Delinquency % | Outstanding Balance |
|---|---|---|
| Anchorage Branch | 54.5% | $13,91,582.4 |
| Atlanta Branch | 48.0% | $42,78,692.4 |
| Austin Branch | 64.3% | $28,93,214.7 |
| Baltimore Branch | 62.5% | $14,58,235.6 |
| Boston Branch | 53.3% | $25,42,675.1 |

## Insight

56.3% of all loans (169 of 300) are Defaulted or In Arrears — more than half the loan book is unhealthy.
Auto loans are the riskiest product at 62.5% at-risk, but every loan type sits above 51% — this is a systemic issue, not a single-product problem.

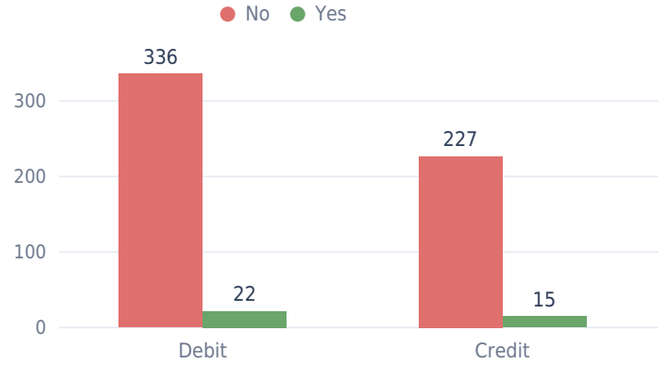

# Card Usage and Product Engagement

Card Active Rate
6.2%

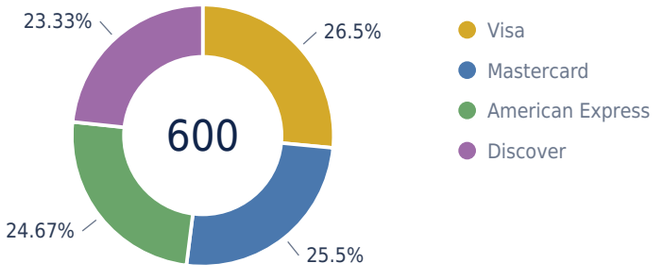

Average Reward Points (Active)
23062

Multi-Product Customer Rate
24.8%

## Debit or credit — which sits inactive more?

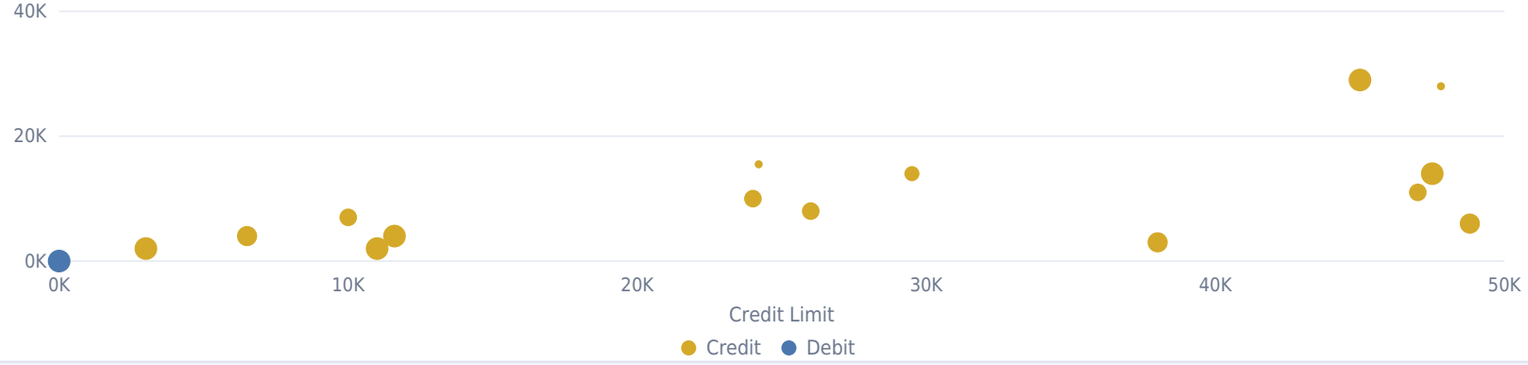

## Market share among issued cards

## Multi-product rate by segment - best cross sell target

| Segment | Multi Product Rate |
|---|---|
| Senior | 34.2% |
| Retail | 28.2% |
| Business | 23.7% |
| Premium | 23.7% |
| Wealth | 21.9% |
| Student | 20.2% |

## Which cards are close to maxing out

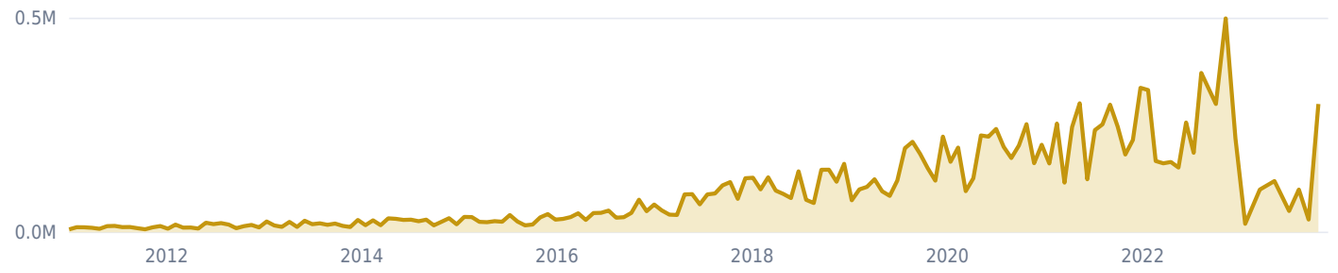

## Insight:

Only 6.2% of the 600 cards the bank has issued are actually being used — this is true for both Debit and Credit cards, and for every card network, so it looks like an activation problem, not low demand.

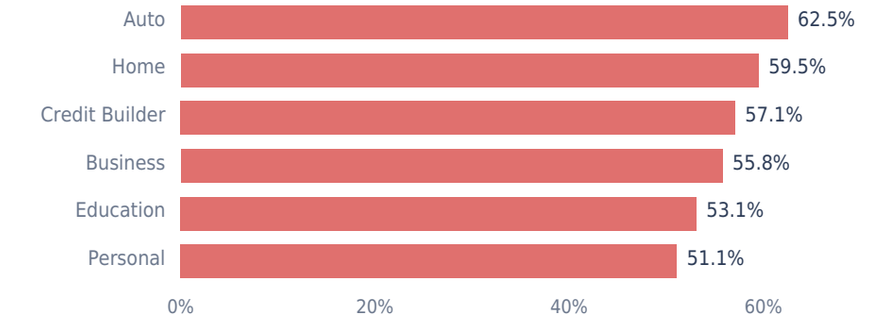

# Retail Bank - Executive Summary

| | | | |
|---|---|---|---|
| Total Customers<br>500 | Total Deposits<br>$10M | Loan Portfolio<br>$72.2M | Loan Delinquency Rate<br>56.3% |
| On-Time Payment Rate<br>28.7% | Card Active Rate<br>6.2% | Failed Transaction Rate<br>32.6% | Multi-Product Customers<br>24.8% |

Deposits over time

Riskiest Loan Type

## Key Insights

1. Over half of all loans (56.3%) are defaulted or in arrears, led by auto loans (62.5%).
2. Only 28.6% of scheduled loan payments are paid on time.
3. Just 6.2% of issued cards are actively used.
4. A third of transactions (32.6%) fail outright, spread evenly across all channels.
5. Credit scores barely differ across segments (677–689), despite a $19,000 income gap.

## Recommendations

**Launch** a collections review on auto and home loans first.
**Investigate** the transaction failure rate — it's a system-wide issue, not one channel.
**Run** a card-activation campaign, starting with Senior and Retail customers.
**Grow** deposits in weaker regions by copying what top branches like Washington do right.
